KIRA · AI MONEY BUTLER

AI implementation workflow

How KIRA understands, reasons, delegates, predicts and turns AI decisions into trusted user actions

Built with LangGraph + Qwen
Specialist agents · grounded AI · HITL

01 · UNDERSTAND
Multimodal input

Natural conversation
Questions, follow-ups and action requests
Example · "Plan my lunch today"

Voice intelligence
faster-whisper converts speech into Butler context
Voice question or expense

Visual understanding
PaddleOCR reads receipt fields with confidence
Image → reviewable proposal

Personal context
Goals · finances · profile preferences · chat memory
Grounds every AI turn

02 · REASON & ORCHESTRATE
Butler Agent · LangGraph

Context Intelligence
Loads financial snapshot, active goals, conversation and long-term preferences before the model reasons

Intent Router
Conversation
Goal · Meal · Work
Forecast · Ledger

Qwen reasoning
Understand intent · choose capability

AI Guardrails
Typed tool schemas
Loop + time limits
Evidence boundaries

Agentic reasoning loop
PLAN → CALL TOOL / AGENT → OBSERVE → REASON
Specialist evidence returns to Qwen until the request is complete

Human approval
Required before writes
Accept · edit · reject

Grounded composer
Explains verified results
Answer + evidence + next action

03 · SPECIALIST AI SYSTEMS
Purpose-built intelligence

Goal Planning Agent
Understands natural-language goals
Builds feasible plans and scenarios
LangGraph subgraph + finance solver

Day Planner Agent
Combines budget and preferences
Ranks real nearby meal choices
Safe-to-Spend + maps + route facts

Work Recommender AI
Expands job search dynamically
Ranks the 3 best live opportunities
Fit + pay + goal acceleration

Foresight AI
Learns spending behavior patterns
Simulates future financial outcomes
Monte Carlo probability + levers

Proactive Intelligence · Briefing + Hindsight
Detects anomalies, unfunded bills and future buffer risk · compares past advice with actual behavior
Nightly personalized guidance → user response → stronger behavior profile

GROUNDED BY · confirmed finance data · user memory · maps/routing · live job boards

04 · ACT
AI-powered outcomes

Butler answer
Clear response + evidence
Streaming AI progress

Personal meal plan
Place · budget · route
Ready to add to the day

Actionable goal plan
Saving amount · date · scenarios
Approval card before saving

Top 3 work ideas
Fit · pay · goal impact
View & apply ↗

Forecast + briefing
Risk, probability and next step
Personalized continuously

KIRA AI DESIGN PRINCIPLES

- AI chooses and explains
- Code verifies money
- User approves changes
- Memory personalizes
- Evidence keeps AI grounded

LIVE DEMO FLOWS

"Plan my daily meal"
Conversation → context → Day Planner AI → grounded ranking
→ suitable place, price, route and alternatives
AI PERSONALIZATION + REAL-WORLD CONTEXT

"Create my savings goal"
Conversation → Goal Agent → plan + scenario reasoning
→ explanation → approval → persistent goal
AI INTENT + DETERMINISTIC FINANCE

"Help me reach it faster"
Goal context → dynamic job search → Work Recommender AI
→ top 3 matches + income/date effect + apply action
LIVE RETRIEVAL + AI RANKING + ACTION
